volume 62, number 30

Shown above is an aerial view of the latest property acquisition by the University: Thomas Jefferson Residence Hall. Closed since after the 1972-1973 school year, the capacity for university housing will, with its purchase, increase from 600 to 1100 students for the 1976-1977 school year.

(Photo by O.P.I.)

University Purchases T. J.

An agreement has been reached between UMR and the Connecticut Mutual Insurance Co. to purchase the Thomas Jefferson Residence Hall for \$1,130,000.

The dormitory is located two blocks north of the main campus at 18th and Rolla Streets. It was first opened as a private residence hall in September, 1966, but was closed to university students in 1973.

The purchase is being financed through a mortgage and unrestricted and redesignated private gifts to the UMR Development Fund.

"This is a major achievement for our campus," UMR Chancellor Raymond L. Bisplinghoff said, "and we owe a great debt of gratitude to all those who have worked so hard to assist in acquiring this facility. This is particularly true of those private donors who helped to make this purchase possible."

Bisplinghoff said that he feels this acquisition removes a major stumbling block to UMR's continuing growth. "Last fall we were severely handicapped by inadequate housing. We know some students did not enroll at UMR as a result. If we had not ob-

tained this dormitory we feel certain this fall's enrollment would have been severely curtailed."

To Open in September

Once all papers are signed and legal arrangements completed, UMR will begin work on renovation required before Thomas Jefferson can be opened for use next September. This renovation is expected to cost about \$250,000 and will be financed through an internal, short term loan involving other development funds. Both this and the original mortgage will be paid back out of income from the dormitory. No state appropriated money is involved.

Without Thomas Jefferson, UMR has dormitory space for 611 students. As of this date, the housing office reports that it already has more than 850 housing requests. 240 more than present space.

Last fall's housing shortage was so acute that space in private facilities off campus was leased temporarily to house about 300 students. Joseph D. Wollard, UMR business officer, reports that "subject to the availability this fall, these

leased facilities will be considered only if there exists a need and all permanent space is filled."

Thomas Jefferson Residence Hall has double occupancy space for 524 students, plus space for six resident assistants and a housing manager. Its room and board charges will be slightly higher than for other UMR dormitories. Double occupancy rates in Thomas Jefferson will be \$1,350 for the academic year, compared to \$1,250 in the other UMR dormitories. Single room occupancy is \$370 for a single room and \$330 for a double room, compared to \$335 and \$295 in other Rolla dormitories.

Extras Cost More

The slightly higher fee for the new facility is to cover added extras such as air conditioning, free parking, elevators, swimming pool, lounges on each floor and the basement level which includes physical fitness and game rooms.

Thomas Jefferson will be operated by auxiliary enterprises. The design of the facility offers flexibility to

consider assignment by clusters to accommodate men, women and special interest groups such as graduate and international students. The hall has centralized dining facilities.

Bisplinghoff Accepts

New Position

Dr. Raymond L. Bisplinghoff, Chancellor here at the University of Missouri-Rolla, recently accepted a post from the office of the Governor, Christopher S. Bond. The Governor wishes Chancellor Bisplinghoff to serve as his Science and Technology advisor.

In his letter of invitation, Governor Bond wrote: "...the responsibilities of the position are varied and limited only by your own judgment as to what the Governor should know on major policy issues affecting the broad fields of science and technology."

Chancellor Bisplinghoff, who has been here at UMR since 1974, received his education in a variety of places. He received two degrees from the University of Cincinnati; these being a B. S. in the Aeronautical field, and an M. S. in physics. He later went to Eidgenossische Technische Hochschule in Zurich, Switzerland where he earned a Doctor of Science degree.

In accepting the offer in February of this year the Chancellor wrote: "... it is, of course, an honor to be asked to work with you and your administration and to undertake this important post. I shall accept, and look forward to the opportunity."

Though no information on the exact details and duties of the position is available, it seems that Chancellor Bisplinghoff is well qualified.

GREEK WEEK 1976

Thursday, April 22:

1:30 p.m. — Opening of Greek Week at Lions Club

— Chariot Judging

— All Greek Bar-B-Que

6:00 p.m. — Softball game at Lions Club

7:30 p.m. — All Greek Beer Bust

Friday, April 23:

6:30-11:00 p.m. — Greek Week Carnival, Lions Club Park

11:00 p.m.-2:30 a.m. — Dance — "Union Station" at the Armory

Saturday, April 24:

12:00-4:30 p.m. — 1976 Greek Games, Elysian Fields.

Page 2

NUCLEAR ENGINEERING

"Liquid Metal Fast Breeder Reactor: Its Role and Potential as an Energy Source and Its Engineering Requirements in Materials and Design" is the topic of a nuclear engineering lecture at the University of Missouri-Rolla, today at 7:30 p.m., Room 104 of the Physics Building. Speaker is Don Rop, manager for planning, analysis and support of the advanced reactors division of Westinghouse Corporation. The lecture is sponsored by the student chapter of the American Nuclear Society. It is open to the public and there is no admission charge.

RETURN LIBRARY MATERIAL

The library wishes to remind students and faculty that all library materials should be checked in as early as possible before the end of the semester, May 7th. Those who will be graduating should clear library records as early as possible. Those who are going to remain on campus either as a student or a teacher should make arrangements with Mr. Gremmmer, Mrs. Heard or Mrs. Simmons at the circulation desk. The library does not permit materials to circulate for the entire summer off campus. Thank you.

SOUTHWINDS

Southwinds, a literary magazine published by GRUMLS (Greater Rolla UMR Metropolitan Literary Society), is now on sale for 75c a copy. This year's magazine features poetry, prose and graphics. Watch for signs indicating sale locations.

SCHOLARSHIP AVAILABLE

A vancy exists on the St. Joe Minerals Company Scholarship for 1976-77. Applicants must be a graduating senior 1977, in the field of engineering. Contact Student Financial Aid Office as soon as possible for application.

ELECTRICAL ENGINEERS

If you are a EE and will be unfortunate enough to be stuck in Rolla this summer and are in need of taking Math 229 (of which is not being offered at this time) contact Judge Hamilton at 341-2165. If we can get together approx. 10 to 15 people we can get it offered with a real live math professor. That's 341-2165 or leave a message at KMNR at 341-4272.

GRADUATE STUDENTS

There will be a meeting of the Association of Graduate Students Monday, April 26, at 7:00 p.m. in room 130 of the Physics Building. This will be the final meeting before the spring picnic. Several departments do not yet have representatives for the 76-77 year. Interested graduate students from the following departments are urged to come and apply for departmental representative: Chemical Eng.; Nuclear Eng.; Math and Computer Science; Mining; Geology and Petroleum Eng. All regular enrolled graduate students in good standing are members of GSA and are welcome to attend.

RUSH IN CONCERT

Rush will be in concert in the multipurpose building, May 1, at 7:30. The doors will open at 7:00 and the concert will be closed to the public. UMR students will be admitted free and may bring one guest per ID. Their guests and the opening band will be Grand Max.

WHO'S WHO APPLICATIONS

Attention Juniors and Seniors. Applications for "Who's Who Among Students in American Colleges and Universities" are now available at the Student Personnel Office or the University Center Information Desk.

GDI

GDI is having a general membership meeting today at 7 p.m. in the St. Pat's Ballroom. Next year's officers will be elected. This is an important meeting so please be there. Refreshments follow the meeting. Also GDI will be holding an afternoon party April 24 at Lions Club Park at Pavilion number 2. The fun begins at noon and lasts until the refreshments are gone. Come out and have a good time. More people make more fun!

UMR TRAP AND SKEET CLUB

The Club invites all students that are interested in learning to safely shoot a shotgun to attend any of their regularly scheduled practice sessions. Practice is held at the Rolla Trap and Skeet Range (J. P. Harris, Owner) every Wednesday and Thursday afternoons from 3:30 p.m. until dark. For more information such as availability of guns, shells and general cost for practice, contact any regular member or Dr. Stevens, 304 Engineering Research Lab, phone 4481.

YEARBOOK PICTURES

Any recognized campus organization who has not, but wishes to, have their yearbook picture taken may do so by calling either Jeanne Achelpohl or Sherri Clark at 341-3560.

calendar of events

April 22-24 — Annual meeting, Missouri Academy of Science.

April 22 — Lecture, Buckminster Fuller, designer of the geodesic dome, "Human and the Universe," 7:30 p.m. Mechanical Engineering Auditorium. Reserved seats for participants in Social Science Symposium, registration fee, \$2. Remaining seats available to the public on a first come, first served basis. Dinner, Manor Inn, 6 p.m. Reservations necessary by April 20. Call Social Sciences Department, Pia Speck, 341-4821, or Bill Kratzer, 341-4200.

April 23 — Symposium on Mining and Utilization of Missouri's Non-Renewable Resources, Mechanical Engineering Auditorium, 9 a.m.-noon; 2 p.m.-5 p.m.

April 23 — Junior Academy of Science and Collegiate Academy of Science research paper competitions; Junior Academy of Science: Mechanical Engineering Building, 1 p.m., general session, all section, Civil Engineering Auditorium, 4 p.m. Collegiate Academy of Science: Social Sciences Undergraduate Symposium, G-7 Humanities Social Sciences Building, session starting at 9:30 a.m. and 1 p.m. Physical Sciences, 104 Physics, session starting at 1 p.m. Biological Sciences, 227 Fulton, session starting at 1 p.m.

ROTC Awards

Ceremony Open

to Public

The annual awards ceremony for Army and Air Force Reserve Officer Training Corps units at the University of Missouri-Rolla will be held at 4:30 p.m. Thursday, April 22, at the National Guard Armory.

Rolla civic leaders, UMR faculty and U. S. Army personnel from Fort Leonard Wood will participate. Lt. Col. Jerry Stroh, commander of the UMR Air Force ROTC detachment, will be the reviewing officer. The UMR Military Band under the direction of Cadet Director Mike Mochel will provide music for the ceremony.

The public is invited to attend.

Diehl Montgomery Ford Sales

Rolla, Missouri

(The Originator Of The
Student Finance Plan
In This Area.)

This plan allows the students upon approved credits and job, to buy a new car with nothing down and payments of \$25.00 per month until you are on the job. This plan is not new, Diehl Montgomery Ford has sold over 750 new cars and trucks to graduating students this way. See us for all the details. Also you can use your own insurance or ours.

FORD LINCOLN MERCURY

This allows the graduating students to have a new car before he graduates when he really needs it. "This is a special discount program for students. We will be glad to quote you a price on a Ford or Mercury product."

riverboat ragtime revue

Musical-Comedy Team Appears

The RIVERBOAT RAGTIME REVUE is scheduled to steam into Rolla tonight to perform for the UMR student body. This musical-comedy performance will be sponsored by the Student Union Board's Fine Arts Committee.

The whole era of the 1890's through the 1920's will be recreated as the group performs songs, comedy, and instrumental pieces from the thirty-year period. The reincarnation of Mark Twain along with the banjo, piano and songs popular throughout the 1890's is bound to please everyone who loves toe-tapping, hand-clapping good time music. What makes the RIVERBOAT RAGTIME REVUE so popular? It seems due to the nostalgic nature of the show. Everyone seems to enjoy hearing tales of the "good ole days" and

listening to music from that period.

Costumed in the period, Ragtime pianist Al Brune leads the musical part of the evening with his amazing keyboard versatility. Terri Johnson sings and dances her way through such songs as "Don't Go in the Lion's Cage, Tonight, Mother", "She's Only a Bird in a Gilded Cage", and the popular "Bill Bailey"! Host for the entertainment is David Seals who portrays Mark Twain. As Master of Ceremonies for the show, Mr. Twain (i.e. David Seals) keeps the show moving at a lively and humorous clip. Dennis Gondreay, known throughout the Rocky Mountain region for his expert banjo playing of the old tunes, rounds out the Riverboat Company.

The RIVERBOAT RAGTIME REVUE will be presented Thursday, April 22 in Cen-

tenial hall at 8:00 p.m. Piano, vocals, banjo, and humor combine to make the Revue a must-see performance. It is free to all UMR students.

It's pre-registration time again

From April 26 through 30, students returning for the 1976 summer and or 1976 fall semester are to meet with their advisors to select courses for the appropriate semester(s). All returning students are expected to preregister regardless of their spring mid-semester grades. Students who preregister for either the summer or fall semester will be permitted to pay fees by mail prior to regular registration.

Complete instructions for preregistration, early registration, and regular registration, may be found in the front section of the "Fall Schedule of Classes." Students may obtain preregistration materials and schedule(s) of classes from the Registrar's Office starting on Thursday, April 22.

Each advisor will be furnished a schedule to be posted near his office the week before preregistration. This schedule will enable a student to reserve a date and time for arranging his preregistration schedule. Students are required to return their preregistration schedule and undergraduate credit card

to the Registrar's Office before 4:00 p.m. on April 30.

Again, for the fall an attempt will be made to schedule students, whenever possible, into the sections preferred. Since it will not always be possible to honor requests for certain sections, the students who follow the instructions outlined in the front of the fall schedule of classes will be given first chance to select the sections they need. Since sections are often added to the schedule after preregistration, students who qualify for priority sectioning (as outlined in the schedule of classes) should have their preregistration card noted accordingly, even though there are apparently no possible variations in their schedule.

Assignment of remaining students into sections will be done by arranging student schedules in order by number of hours of credit earned and as long as possible, requests for particular sections will be honored. Since all sections of all courses cannot be offered at popular times, it will be necessary to rearrange some schedules to balance sections.

MISSOURI MINER

Page 3

full schedule planned for social sciences symposium

ROLLA, Mo., April—The Missouri Academy of Science (MAS) will hold its 1976 annual meeting at the University of Missouri-Rolla April 22-24.

Special events include speeches by Buckminster Fuller, designer of the geodesic dome, and James Boyd, materials expert, and an all-day symposium on mineral resources of Missouri.

Dr. Fuller's lecture April 22 is the keynote event of the first annual Social Sciences Undergraduate Symposium. Dr. Otto Hill, president of the MAS and UMR professor of physics, says that the symposium inaugurates the formation of the Social Sciences Section of the collegiate academy of MAS. The symposium is sponsored by the Student Advisory Council of the UMR social sciences department.

Fuller, who will speak on "Human and the Universe," is a world famous author, inventor and designer. The geodesic dome is the most popular of his designs employing his Dymaxion Theory—"doing more with less." Now 80, he is world fellow in residence, Consortium of the University of Pennsylvania, Haverford College, Swarthmore College, Bryn Mawr College and University City Science Center, and is the distinguished university professor at Southern Illinois University. He is the author of numerous articles and books, the latest of which is "Synergetics: Explorations in the Geometry of

Thinking."

Dr. Boyd, president of Materials Associates, Washington, D.C., will speak on "The Mineral History of Civilization" at the academy's annual awards banquet April 23. He has had a long career in government, private industry and education. He has served as executive director of the National Commission on Materials Policy, director of the U. S. Bureau of Mines, president and chairman of Copper Range Co., vice president of Kennecott Copper Corp., and dean of the Colorado School of Mines. He is past president of the American Institute of Mining, Metallurgical and Petroleum Engineers and of the Mining and Metallurgical Society of America.

"Mining and Utilization of Missouri's Non-Renewable Resources" is the topic for the April 23 day-long symposium for all members of the academy. Speakers are representatives of industry, government agencies and education.

In concurrent sessions April 23, pre-college and undergraduate college students will present papers in many different areas. In the social sciences undergraduate symposium during the morning, papers will be presented in six fields. In afternoon sessions, other student sin the collegiate academy will compete in paper presentations in physical and biological sciences. Participants in the junior academy

are winners of district contest and will compete in seven categories. Winners in the paper contests will receive awards at the banquet that evening and outstanding science teachers of Missouri will be honored.

About 130 papers will be presented in technical sessions April 24 for members of the senior academy. Areas covered include environmental sciences, engineering, agri-biology, science education, geology-geophysics, physics, chemistry and linguistics.

The 800 member academy includes representatives for educational institutions, government and industry in Missouri.

R. Buckminster Fuller

Presenting

"Human And The Universe"

April 22

ME Auditorium

Blue Key Miner of the Month

Blue Key is proud to announce that Dr. David Oakley and Dr. Robert Wolfe were chosen co-Miner's of the Month for March. Nominated by the St. Pat's Board, both men were instrumental in the success of the St. Pat's celebration.

Dr. Oakley is the man behind the music during St. Pat's. He organized all the music for the coronation Friday night, including investigating the protocol for visiting dignitaries. He also works closely with the Board on the parade. He helped gather the bands, and gets the judges for the band competition. After the parade, he gathers the results

and supervises the trophy presentations.

Dr. Wolfe is another without whom St. Pat's would not be a success. He casts medallions for all the honorary knights at the coronation and the students at the knighting ceremony, about 30 total. He also designed and hand lettered a scroll which Governor Bond signed when the court went to Jefferson City.

Neither of these men received any compensation for the work which they did, it was strictly "above and beyond the call of duty." Blue Key feels that both of these men deserve the distinction of Miner of the Month.

calendar of events

April 23 — Awards Banquet, 6:30 p.m., Centennial Hall, speaker, Dr. James Boyd, president of Materials Associates, Washington, D.C., will speak on "The Mineral History of Civilization." Reservations necessary by April 20. Call Bill Kratzer, 341-4200.

April 24 — Technical Sessions, Senior Academy, Sessions on Argi-Biology, Chemistry, Engineering, Environmental Sciences, Geology-Geophysics, Linguistics, Mathematics, Physics, and Science Education.

April 25 — Baseball, Lindenwood, 1 p.m. Free.

Michael Burns UMR's Poet in Residence

"I love"

"You love"

"We love"

"They hate"

by Linda Ponzer

Southwinds, the unofficial student magazine that contains various pieces of student writings.

Michael is a graduating senior in Psychology. Upon graduation in May, he will attend Grad School at the University of MO in Kansas City, studying in the field of clinical psychology.

Reflecting on his view of life and the world around him, Michael said: "The world is a dirty rotten stinking place, but life is so near."

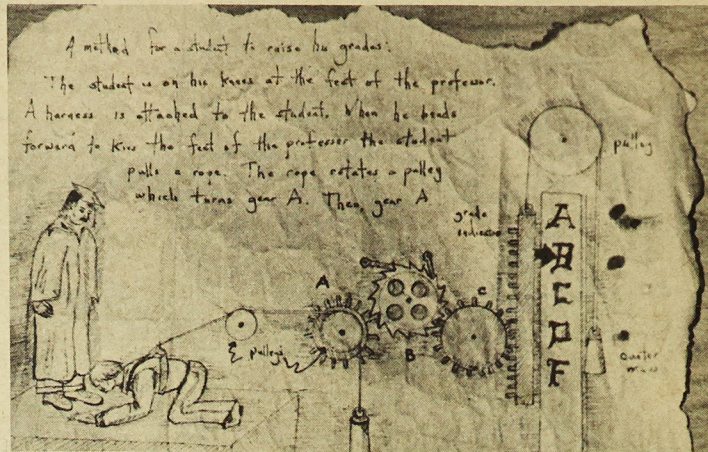

The above poem is just a brief example of Michael Burn's work. He writes on topics that he hears and reads about and also from personal experiences. A lot of his poetry deals with his past life in prison. Here at UMR on the prisoner release program, Michael had this to say of the program, "In Rolla you actually get back into society," whereas the program at Rems Farm, "you still live at the penitentiary and don't really adjust back into society."

Michael has been on the prison release program since January of 1974. While on this program a prisoner is allowed to work and or study outside of the prison without the supervision of a guard. He first started his schooling at Lincoln while working first for the House of Representatives and then for the MO Division of Insurance. He came to UMR the Summer session of 1975.

In his poetry he "communicates feelings to others." "If it didn't feel good I wouldn't write," said Michael expressing the emotional tie-in to his work. He really enjoys writing, it serves as one outlet to express his feelings or opinions on life.

Commenting on the prisoners release program Michael said, "it's very successful in comparison to incarcerating people." This program gives prisoners a chance to become rehabilitated, so when they are released after serving their time they will be up on what's happening.

In his prison-oriented poetry he expresses his views on what he saw and experienced inside the Jeff City Penitentiary. His work can be read in this years

The geology department is currently involved in evaluating the above piece of archeological data, a document of which a small portion is here shown. The ancient artifact was found among the rubble in the basement of the Ceramic Engineering Building during its renovation. The initial reaction of experts is that the documents implications are broad indeed; could feet kissing (which has evolved in modern times to ass-kissing) truly be the oldest profession.

Dear Sir:

I was deeply impressed by the letter describing the monumental effort which KMNR's staff of 40 employees make for their station, although I must admit that I was a bit perplexed as to what became of that staff a few weeks ago when I heard a KMNR DJ announce: "Is there a DJ out there? I'm leaving at 6 and we don't have a DJ for the evening show, so if we don't find one we'll have to close down."

Quite sincerely,

PRESSURIZED WATER REACTOR POWER PLANT

This year, we will choose a select number of top college graduates for our Nuclear Power Program. And naturally, we want to give every qualified man a fair chance of being considered. So, we urge you to act quickly.

The first thing you should know about the Navy's Nuclear Power Program is that it is probably the most comprehensive training available in the nuclear field.

It is also the most rigorous.

It's got to be. The majority of our country's nuclear reactors are operated by Navymen. And since we expect you to begin work as quickly as possible, it is an accelerated program.

The hours are long. The course difficult.

What's more, in order to qualify, you must have a solid background in engineering, math or physics. And have what it takes to be an officer in the U. S. Navy.

You must also be a man with a unique sense of dedication. For, once you have completed our program, you could be in charge of the supervision, operation and maintenance of a division of the reactor plant on one of our nuclear-powered ships or submarines.

You've studied and you've worked. Now make it all mean something. Find out more about the Navy's Nuclear Power Program from our Officer Programs Officer when he visits your campus. Or, call collect Lt. Chris Heuser, (314) 268-2505.

Explore the Nuclear Navy

Greek Week Queen Candidates

Kim Pribula

The men of Delta Sigma Phi Fraternity present Kim Pribula as candidate for Greek Week Queen. Kim is a 1974 graduate of Kirkwood Senior High School in St. Louis, Missouri, where she resides. Kim is now a sophomore majoring in Geology at Southwest Missouri State University. She has had 6 years of art and enjoys every aspect of arts and crafts. She is an avid backpacker and camper and enjoys anything related to nature. However, her favorite activity is horseback riding. We all wish her luck as our candidate for Greek Week Queen.

Mary French

As a junior majoring in physical education at the University of Missouri - Columbia, 20-year-old Mary French is active in many areas. Following her interest in sports she has participated on the Varsity swim team, softball team, and Junior Varsity volleyball team. She serves as vice-president of the M-Women Club (Varsity letterwomen), which nominated her for Homecoming Queen last fall.

Although active in women's sports Mary has supported men's athletics for the past two years in the capacity of cheerleader, one year of which she was captain.

As a member of Kappa Alpha Theta sorority, she has served as intramural's chairperson and presently has demonstrated her belief in the importance of the scholastic element of a college education by being on the dean's list four semesters as well as being accepted to Sigma Tau Sigma and Kappa Epsilon Alpha honorary societies.

The brothers of Phi Kappa Theta are proud to present Miss Karen Stackable as their Greek Week Queen candidate. Karen is from Mr. Vernon, Illinois and is presently a senior at the University of Missouri-Columbia majoring in housing and interior design. She is an active member of the American Society of Interior Designers and in her leisure time she enjoys snow skiing, swimming, water skiing and softball. For the past three years, Karen has participated in and thoroughly enjoyed the Greek Week festivities. We at Phi Kappa Theta have always enjoyed her presence on party weekends and we feel she would be an excellent choice for Greek Week Queen.

Karen Stackable

Beta Sigma Psi is proud to present Miss Suzie Johnson as their 1976 Greek Week Queen Candidate. Suzie's hometown is Waynesville, Mo. where she was born and raised. She graduated from Waynesville High in 1974 after a very active extracurricular career, cheerleading, choir and many more. Suzie now attends Mizzou where she is majoring in business, and hopes to graduate this May. Suzie has many interests including horseback riding, reading, motorcycle woods riding, swimming and many other outdoor activities. Suzie's delightful smile and gregarious personality make her an excellent candidate for this year's Greek Week Queen.

Suzie Johnson

Deb Kusmec

The brothers of Alpha Epsilon Pi are proud to have Deb Kusmec as their 1976 Greek Week Queen candidate.

Deb is a freshman here at UMR majoring in Computer Science. Her hobbies include water skiing, roller skating, and sewing. She also likes to go fly a kite occasionally. Deb is a Sister of Alpha Epsilon Pi, a Collegiate member of Kappa Delta Sorority, and also belongs to Phi Eta Sigma.

Alpha Epsilon Pi feels that Deb's cheerful disposition, golden hair, and sparkling blue eyes make her a queen fit for the gods.

Cindy Rice

Cindy Rice is a freshman at UMR majoring in Psyc. Her cheerfulness and lighthearted character make her a shoe in for Theta Xi's nomination. The Brothers of Theta Xi wish Cindy and the other candidates the best of luck.

Renee Moles

The brotherhood of Kappa Sigma is proud to nominate Renee Moles for Greek Week Queen. Renee, wife of Brother John Moles, is 19 yrs. old and originally from Kansas City, Mo. After working in K. C. as an electrocardiograph technician, she is now employed at Phelps County Memorial Hospital as a nurse's aide. Renee enjoys reading, sewing, and music.

The brothers of Tau Kappa Epsilon Fraternity are proud to present Miss Alicia Rivera as our candidate for this year's Greek Week Queen.

Miss Rivera is a twenty-one year old beauty from Bay a mo'n, Puerto Rico. She is presently a sophomore majoring in Liberal Arts at UMR.

Her hobbies include reading and collecting poetry, swimming and dancing. She is a member of TKE's Little Sister organization. During the summer Alicia works as a professional model in Springfield, Illinois. We feel that she would be an excellent choice as Hera, Goddess of the Greeks.

Alicia Rivera

The Sisters of Kappa Kelta proudly present as their Greek Week Queen candidate Miss Pamela Hill. Pam, daughter of Mr. and Mrs. Harold Hill of Dexter, Mo., is currently a sophomore here at UMR majoring in engineering management with a civil minor.

Pam is a member of Kappa Delta sorority where she serves as assistant treasurer, house manager, and representative to the Interfraternity Council. She is also pledging the Society of Women Engineers at this time. In her spare time Pam enjoys playing tennis, jogging, and swimming.

Pamela Hill

The men of Sigma Phi Epsilon Fraternity proudly present Miss Lisa A. Dodson as their 1976 Greek Week Queen candidate. Miss Dodson is the daughter of Helen Dodson of East Alton, Illinois. She is currently a freshman at Illinois Wesleyan at Bloomington, majoring in Drama. As a sister in the Sigma Kappa Sorority she is Activities and Homecoming chairman. Miss Dodson is going into a career in Drama, and is presently in contemporary theatre dance group at Wesleyan.

The brothers of Phi Kappa Theta are proud to present Miss Karen Stackable as their Greek Week Queen candidate. Karen is from Mr. Vernon, Illinois and is presently a senior at the University of Missouri-Columbia majoring in housing and interior design. She is an active member of the American Society of Interior Designers and in her leisure time she enjoys snow skiing, swimming, water skiing and softball. For the past three years, Karen has participated in and thoroughly enjoyed the Greek Week festivities. We at Phi Kappa Theta have always enjoyed her presence on party weekends and we feel she would be an excellent choice for Greek Week Queen.

The Brothers of Theta Xi wish Cindy and the other candidates the best of luck.

Candidates - 1976

Patty Marion

The brothers of Delta Tau Delta are proud to present Patty Marion as our candidate for Greek Week Queen. Patty, a graduate from SEMO, now teaches elementary school in Cuba Missouri. Her college honors include membership in Kappa Delta Pi, Pi Omega Pi, Sigma Alpha Iota, music fraternity and the Golden Eagles Marching Band. Originally from Bloomfield and now a Rolla resident, her hobbies include swimming, sewing, softball and playing the piano.

We are sure that Zeus, and the student body will be proud to have Patty as the 1976 Greek Week Queen.

The men of Alpha Phi Alpha proudly announce the selection of Ms. Dorris Ann Simmons as their Greek Week Queen candidate. Dorris is a junior at UMR majoring in Engineering Mgt. She graduated from Summer High School in St. Louis. Her career objectives are obtaining a MBA and becoming an engineering consultant. Dorris' hobbies are bowling, skating, chess and sewing.

Dorris' loveliness, accented by her amiable personality makes her a pleasant person to be near. Her presence on the court will assure an overabundance of beauty at the coronation.

A Queen indeed. . . Ms. Dorris Ann Simmons.

Doris Simmons

The brothers of Lambda Chi Alpha are proud to present their 1976 Greek Week Queen Candidate, Miss Monica 'Niki' Boothby. A striking 5'9", she hails from Hazelwood, Missouri.

She enjoys swimming and water skiing, but is especially interested in "anything to do with horses." Living on a ranch she has plenty of time to pursue her hobby, and can frequently be seen at various horseshows and rodeos in the Missouri-Illinois area. In 1971 a horse she trained and rode took the Missouri State Championship in Barrel Racing.

Niki is currently enrolled in the nursing program at Florissant Valley Community College and in her off hours works at a discount house.

We feel Niki would make an excellent choice to reign over the Greek Games.

Nicki Boothby

Lisa Dodson

Caroline Sebree

The men of the Missouri Mines Chapter of Triangle Fraternity are proud to present Mrs. Caroline Sebree as their Greek Week Queen candidate for 1976.

Caroline, a 21 year old brunette from Macomb, Illinois and a graduate of Spoon River Junior College, is presently employed as a secretary by the Computer Science Department here at UMR. She enjoys water skiing, sewing and reading.

Kathy Mueller

The brothers of Acacia Fraternity are proud to announce Miss Kathy Mueller as their Greek Week Queen candidate. Kathy, a petite brown-eyed brunette, is a graduate of Mehlville High School in St. Louis. Among her varied activities include swimming, water skiing, and horseback riding. The brothers of Acacia feel that Kathy would make a lovely and charming Queen to reign with the gods over UMR's Greek Week.

Patricia McGlasson

The brothers of Sigma Pi, feel privileged to present Miss Patricia McGlasson as their representative for 1976 Greek Week Queen.

Patricia a former University of Missouri-Columbia student, is well acquainted with the Greek system. She is a member of the Gamma Phi Beta sorority there.

This 5'9", red haired, blue eyed beauty, enjoys swimming, tennis, and sewing as her hobbies. She is very much involved in her recent work and activities.

The brothers of Sigma Pi wish Patricia the best of luck as our entry for goddess of beauty.

Sigma Tau Gamma proudly presents Miss Lori Anne Johnson as its queen candidate for Greek Week of 1976. As a native Oklahoman, Miss Johnson is presently enrolled in Northeastern Oklahoma Junior College, where she is active as a member of the "Nor-seStars"; a drill team well known throughout Oklahoma. Therefore, the brothers of Sigma Tau Gamma feel that Miss Johnson will represent us favorably as our queen candidate.

Lori Anne Johnson

The brothers of Pi Kappa Alpha are proud to announce Miss Margie Clifford as their 1976 Greek Week Queen candidate. Miss Clifford, a ravishing brunette, is a graduate of Pattonville High School in Creve Couer. The stunning eighteen year old from Bridgeton, Missouri is currently employed as a secretary by Permanerr Mfg. Co. Inc. in St. Louis.

Margie Clifford

Zeta Tau Alpha is proud to have Debbie Shanta representing them as their Greek Week Queen candidate. This past year she has been service chairman and next fall will serve as Vice President. Debbie attended Southern Illinois University where she received a degree in education and is currently a psychology major at UMR studying to be a school psychologist. Debbie is a Beta Sigma Psi Little Sister and an active member of Gamma Alpha Delta Service Fraternity. In her leisure time she enjoys sewing and doing volunteer work with the local Head Start Program.

Debbie Shanta

David Thompson and Ben Smith practice some of their own style of music.

Photo by Burford

Student talent is broad

by Linda Ponzer

Whether your talent be running a turn table or pouring hot metals, UMR has a place for you.

Radio station KMNR is totally student run, from the DJ to the business manager. There is only one basic requirement demanded of the DJ's they must have a valid FCC license and follow the FCC rules and regulations. The station handles mostly "popular music" and has weekly spots where a complete album is played without a break.

If fooling around with hot metals is your bag, then Met. 123 would be right down your alley. Professor Bob Wolf instructs the class in the basic fundamentals of metal forming. The major categories covered are casting, welding, and working. The class is then allowed to show their artistic ability in forming metals. A public showing of their work at the end of each semester is planned to show off the talents displayed by the students.

Of the many different pieces made by members of the class

this past semester there was an apple of aluminum, several cast iron tetrahedrons, white and yellow brass animals, brass sanderipitus art, as well as the typical ash trays.

There are many miners whose talent is playing the guitar. Bob Born, a senior in computer science, plays his own special style of guitar each Thursday night from 10:00 p.m. to 1:00 a.m. at Frederic's on Hwy 63 and Cedar. His music ranges from Bluegrass to Folk to Mild Rock. Each week his music draws a crowd. He has

been playing the guitar for six years, he also plays the banjo accordion and a bit of piano.

Two others of the many notable guitar players on campus are Ben Smith and David Thompson. Ben is currently a sophomore in EE with plans of graduating in 1978. He has played the guitar for four years. David though not currently enrolled at UMR plans to enroll for the summer session, he has been playing the guitar for six years.

It takes more than a degree to make you an engineer.

You're working hard for your degree in engineering. But what will you do when you get it? Where will you get the practical experience you need to make that degree pay off?

More and more people like yourself are discovering that one of the best places to get on-the-job engineering experience is in the U. S. Navy. As a commissioned officer in the Civil Engineer Corps.

Don't let the word "civil" mislead you. The Navy's looking for applicants with degrees in electrical, mechanical, industrial, architectural, construction, nuclear and chemical engineering, too.

The standards are high. And the opportunities impressive. You'll have a chance to travel. Stretch your mind. And get your hands on projects you couldn't expect to touch for years in civilian life.

Think you measure up to a get-ahead job like this? Why not find out.

Call: Lt. Chris Hauser collect at (314) 268-2505 for details.

Navy Civil Engineer Corps.

Continued from Page 8

Ben and David both play the six and the twelve string guitar, with Ben branching out on the keyboards and David on the mandolin. Ben sings along with a mellow style all his own while David harmonises, together they form a unique duo. They play at the Christian Campus House and at a group called Young Life. Young Life is a National Interdenominational youth group for young Christians.

From audio talent to visual talent, UMR has it all. If painting is your thing the Art I and Art II is for you. Art I is a lecture course where the history and fundamentals of art are taught by Dr. Koenig. In Art II the student begins to sketch, draw and finally paint, the subject matter being completely composed of the human figure. Currently the studnets are using a live female model clad in a bikini as the subject for their sketches.

Another visual talent which is predominant on campus is that of Journalism. The outlets for this talent are many, they are; the Miner, Rollamo, Engineer, and Southwinds.

The Miner, the official school newspaper is printed once a week. The staff is completely composed of students from the main editor to the lay-out personnel. The staff is paid by student funds, and the paper is completely paid for by the advertisers. Being a student run

Working in the Met 123 Lab, Dave Muenks uses the polishing wheel.

Photo by Burford

and operated paper, the Miner staff encourages students to express their opinions on what is going on at campus by writing to the editor. Simply dropping their letter into the Mailbox at T-1, room 101.

The Engineer, the unofficial school magazine comes out four

times during the school year. The Engineer is the most technical publication on campus which is currently being produced by the students at UMR. Although not funded by the school, it pays for itself through advertisements. The staff consists of a few intelligent Miners who write, edit, layout and completely govern the publication of the magazine. The staff encourages students to write in suggestions and criticisms and does publish the letters they have room for.

The Rollamo is the yearbook at UMR. At present it is student run and operated, and funded for by student funds. The staff does everything from cropping the pictures to a desired size to drawing the layouts to writing the copy and headlines.

Southwinds is the unofficial school magazine for studennts writings. The expenses are paid for partially by a university grant, but mostly through the sales of the magazine. It has been published here at UMR for the past four years this being the fifth. It is currently on sale in the University Center for seventy-five cents.

Theatrical talents also have an outlet on Campus. It is Theatre Guild, which has several productions each year. Past productions include; an Opera-Trouble in Tahiti, Plaza Suite, and Kiss Me Kate to name a few. All directing, acting, and lighting is student done. Ubiquitous Sam, the Guilds latest presentation was written by Professor Luffel of the Math and Computer Science department.

The mentioned talents are just a few of the many on Campus. No matter what your talent is, you can be sure to find a place for it at UMR.

KMNR DJ, Dan Williams "listens to the music."

Cinderman Beat Valley

Last Thursday while the rest of the students were on vacation the UMR track team was hard at work. The Miners defeated Mo. Valley College in a dual meet by a score of 82 to 62. Rolla won first place in a total of ten events. Roger Vessel was the individual with the highest number of team points as he took first in four events. Vessel took first in the long jump and the 220 yard dash and tied for first in the 100 yard dash. In the mile relay, which took first. Vessel was the anchor man. In the 440 yard dash Rodney Bullock took first place while Greg Kaiser won first in the 880 yard run. David Sorrell, David Craycraft, and Ray Dye all took first places in the mile run, the three mile run, and the high jump respectively. The highlight of the meet was Keith Spalding's new school record of 14'2" in the pole vault. Overall the times for the individual events were slower than average due to the slowness of the track.

Last Saturday Roger Vessel participated in a feature event held at CMS. All top ranking 440 yard dash men were invited to participate in the feature event. Vessel of UMR took second place with a time of 48.9.

So far this season three UMR trackmen have qualified in four events for nationals. The year nationals will be held at Slippery Rock, Penn. Rodney

Bullock has qualified in the 100 yard dash with a time of 9.6 seconds and in the 220 yard dash with a time of 21.6 seconds. Ross Clie qualified in the high jump with a jump of 6'8". Craig O'Dear qualified in the high hurdles with a time of 13.96 seconds.

The next track meet for the Miners will be the SMS relays on April 23 and 24.

Miners Capture First Victory In Win Over Lincoln.

It has been a tough season for the UMR baseball team. But they finally put it together and won a game against Lincoln University, on April 10, before the Easter break.

On Friday afternoon, April 9, the Miners lost to LU 3-0, but on Saturday they won the first game of the double-header 7-2. Lincoln came back to win the second game, 6-5. The Miner hitting attack, which had been dormant all season, actually produced seven runs in one game, and for the weekend UMR outscored Lincoln 12-11.

During Easter Vacation, the Miners were rained out April 13 at Evangel College, and April 20

against the College of St. Francis. They did get to play three games against Northwest Mo. State on April 16-17, but they lost all three games. On Friday afternoon, they lost 4-3 on an unearned run in the top of the seventh inning. In the first game Saturday, the Miners allowed three unearned runs and lost 5-3. The second game was never close as NW won 5-0.

The team will be in Springfield this weekend for three games against SMSU. If the Miners continue hitting, and rediscover their defense, which was lacking this past weekend, they should win some games. The pitching has been fairly consistent lately. With a few breaks, the Miners will win some games instead losing the close ones.

Golfers Split

Recently the UMR Golf team went to St. Louis where they played in a double dual meet with St. Louis University and UMSL. The Miners came out on top of SLU, while they fell behind UMSL. Each school played six men but only the best four were counted. The top four players for UMR were; Mike Keiffer, Wess Goodson, Royce Vessel, and Alan Parkinson. The Miner's medalist was Mike Keiffer with a round of 74 points.

Last weekend Rolla participated in the "Heart of America Golf Tournament." The tournament was held at CMS and involved 25 teams. UMR came in sixth place overall in the five man tournament. The Miners were led by Bruce Roney who shot a 78 and a 74 for 152 point total. The other four golfers and their scores were as follows; Alan Parkinson with a 73 and a 81 for a 154 total, Mike Keiffer with a 80 and a 78 for a 158 total, Royce Vessel with a 81 and a 78 for a 159 total, and Wess Goodson with a 83 and a 80 for a 163 total.

The MISSOURI MINER is the official publication of the students of the University of Missouri-Rolla. It is published at Rolla, Missouri, every week during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879. The subscriptions are \$2.00 per semester. This MISSOURI MINER features activities of the students and faculty of UMR.

Pi Kappa Alpha And Tech-Engine In Softball Finals

Intramural softball is in the process of closing out. Barring rain tonight the intramural softball champion will be decided by around 10:00. The game is scheduled for 8:30 at the Ber Juan softball fields. During the final game the third

and fourth place teams will be fighting for points on the other field.

The quarterfinal games were played before Easter break, as were the semi-finals. In the quarterfinals which were last Monday night, Pi Kappa Alpha

handily defeated Sigma Phi Epsilon 10-2, on the other field Tech Engine edged Tau Kappa Epsilon in a slugfest 18-13. In the nightcap games Kappa Alpha slipped by the Mates 9-8, and Theta Xi defeated Phi Kappa Theta 10-3.

This left two games for the semi-finals the next night. Pi Kappa Alpha came out on top with Kappa Alpha 9-4, and Tech Engine defeated Theta Xi by a score of 11-7.

For the finals tonight Pi Kap will tangle with Tech Eng. which will be a very good game for the finals this year. In the third place game KA will play Theta Xi. Both games will start at 8:30.

This year was one of the best ever for softball, everyone seemed to enjoy playing this year and we had just enough upsets to make it exciting. In one league, League II, things were really hectic as there was a three way tie for first and there was a flip of a coin and KA won the flip. This left Tech Eng and Wesley to have a tie breaker game for second place in the league and a shot at the playoffs. The game turned into a rout as Tech Eng blasted Wesley 17-3. Tech Eng must have used the game as a warm-up game, because they have made it all the way to the finals.

All the support possible would really be appreciated tonight, so everyone come out and watch some very good softball, maybe you'll learn something.

Frisbee throwing has become a popular sport on the UMR campus as it has all over the country. Here a UMR student works on his frisbee catching.
(Photo by Harris)

Frisbee Throwing Becomes Popular

Ever encounter the dangers of a runaway frisbee? If not go to the guard on most weekday afternoons and you'll find a group of Miners who enjoy the fine sport of frisbee throwing. They have even invented a murderous new game of suicide frisbee. where one hapless individual sits down on the grass and places an empty soda can atop his head, the object being to remove the can using the frisbee and without decapitating said individual.

Many styles of catching these frisbees are also exemplified. There's always the one hand straight on catch, which can be executed with either a slight twist of the shoulders or a complete twist and jump into the air. Another style is the one finger sping, the art of this move is to successfully catch the frisbee on one finger without stopping the spinning motion. The frisbee will then gently spin to a halt and can be thrown again.

Novelty catches are also on the uprise. There's the two hand squat, back handed catch, and the all time favorite of the tree catch. The two hand squat catch is the best executed with a low flying frisbee. The person attempts to catch the frisbee between his legs, using both hands. No serious incidents have been reported (as of yet) from a miss caught frisbee.

The back handed catch is where the person attempting to catch the frisbee uses one hand behind the back, he then twists slightly in the direction of the frisbee and catches it (hopefully) using the hand behind the back.

Finally the all time favorite catch, the tree catch, this catch can be executed in several ways. The way most often used is to watch the frisbee and run right into a tree, but regaining your posture in time to successfully dive catch the frisbee.

Dear UMR Graduates:

Congratulations on your forthcoming graduation. You have worked hard to receive your degree and one of your rewards will be an opportunity to work in the engineering department of the company of your choice.

Our company has offered special finance arrangements to the UMR seniors since 1951. We offer these same terms to you on the new Buick or Oldsmobile of your choice. These terms include a low down payment of trade in and low monthly payments until you are established in your new position.

We would like for you to visit our dealership and see the new models we have on display. Our sales staff will then price a car to your exact specifications and be most happy to order it for you if you desire. It would be a nice graduation present.

Very truly yours,

Robert A. Eck
